start with the walls

Let Aspiring Walls bring your homes' walls to life! As well as a choice of colours across the spectrum, there are patterns that make a statement - close to being works of art - or subtle, in vogue tone-on-tone patterns and textured wallpapers for a warm background to enhance a space rather than take it over.

New technology has also made wallpaper easier and quicker to install, and much simpler to remove when it's time to re-decorate.

Experience endless possibilities. **Be bold. Be inspired.**

bold style

If you want wallpaper to be striking and to attract attention, choose the bold, daring, larger themes or a wallpaper mural.

This means only covering one or two walls of the room. It allows the other elements in the room to stand out as well.

Ashford Tropics, AT7068

WALLPAPER CAN BE A SOPHISTICATED AND SUBTLE BACKGROUND OR THE 'SHOW-OFF' CENTRE PIECE

a warm, cozy element

In this case, use smaller patterns and cover all walls in the room. Choose a contemporary designed wallpaper with delicate patterns and texture to complete the look of the room.

Whites and neutrals - with a nautical drift, 25714

combination

In this option, we combine a more visual pattern on a dominant wall with a smaller or subtle pattern on the other walls.

It is best to combine wallpaper patterns that fit together. In ideal cases, the patterns are already designed for combination.

Geonature, 366040 and 366032

create individual zones

Wallpaper can play a key role when you're looking to highlight separate zones throughout your home.
